ABOUT US

Peel Resource Recovery (PRR) is Western Australia's leading provider of waste-to-resource and material processing solutions, backed by over 50 years of heritage in civil contracting and resource recovery. As a proud locally owned business, we specialise in crushing and screening, demolition, site remediation, waste management, and material recycling – delivering innovative and sustainable solutions across WA. Our mission is to transform waste into valuable resources, supporting Western Australia's circular economy while upholding the highest standards of community and environmental responsibility.

WHY US

- Six decades of experience with roots dating back to 1964 (formerly J.W. Cross & Sons).
- WA's only accredited C&D material recovery plant – transforming waste into high quality construction resources.
- End to end service delivery: demolition → waste management → recycling → supply of construction materials.
- Proven track record delivering large, complex projects for mining, government, infrastructure and civil sectors

VISION

To redefine resource recovery in Western Australia by transforming waste into sustainable construction solutions—setting the benchmark for environmental stewardship, innovative crushing technologies, and community-centric service.

MISSION

To deliver innovative waste management and material solutions through transparency, community partnership, and environmental excellence—turning waste into sustainable resources for Western Australia.

01

PRR's mission addresses key industry issues like waste inefficiency and environmental impact. By focusing on innovation, transparency, and community partnership, PRR lays the groundwork to achieve its vision of turning waste into sustainable construction solutions.

03

By setting clear goals around compliance, safety, and public trust, PRR tackles industry challenges like contamination and recycling inconsistency—moving closer to its long-term vision.

02

To achieve the vision, PRR targets landfill reduction, high-quality material production, and advanced crushing technologies—ensuring waste becomes a valuable resource, not a burden.

04

PRR's objectives focus on sustainability, operational excellence, and environmental responsibility—making its vision of redefining resource recovery both actionable and achievable.

CORE CAPABILITIES

01 Waste Management

Peel Resource Recover is WA's leading waste management expert, providing safe, eco-friendly solutions for site cleanup, asbestos removal, and recycling services across the Perth Metro region and down to Augusta.

02 Crushing & Screening

Peel Resource Recovery provides licensed crushing and screening services in WA, transforming waste and virgin materials into quality aggregates with 50+ years of expertise.

03 Site Remediation

Peel Resource Recovery provides expert soil and site remediation services across Western Australia, we are experienced treating all types of contamination—including hazardous materials—to restore safe, compliant land.

04 Demolition

With over 50 years of experience, our licensed team handles projects of all sizes. We prioritize safety, efficiency, and environmentally friendly practices to ensure thorough and responsible demolition and cleanup every time.

05 Asbestos Disposal

Peel Resource Recovery experienced in providing safe and compliant hazardous waste solutions as a licensed asbestos disposal provider in Western Australia..

06 Construction Materials Supply

Peel Resource Recovery provides environmentally friendly construction materials in Western Australia. Our offerings include yellow sand and recycled aggregates, such as crushed concrete. All products are quality-tested.

07 Tyre Disposal

Peel Resource Recovery is Licensed tyre disposal specialist, offering eco-friendly recycling and advanced storage solutions for all tyre types. We ensure responsible handling and environmental compliance across WA.

08 Equipment Hire

Peel Resource Recovery offer a range of high-quality crushing and screening equipment for hire, delivering flexible, reliable, and cost-effective solutions to support construction, mining, and resource recovery projects.

09 Heavy Haulage

Peel Resource Recovery provides safe, efficient heavy haulage and bulk transport services for large and oversize loads across Western Australia, supporting a wide range of industries with reliable logistics solutions.

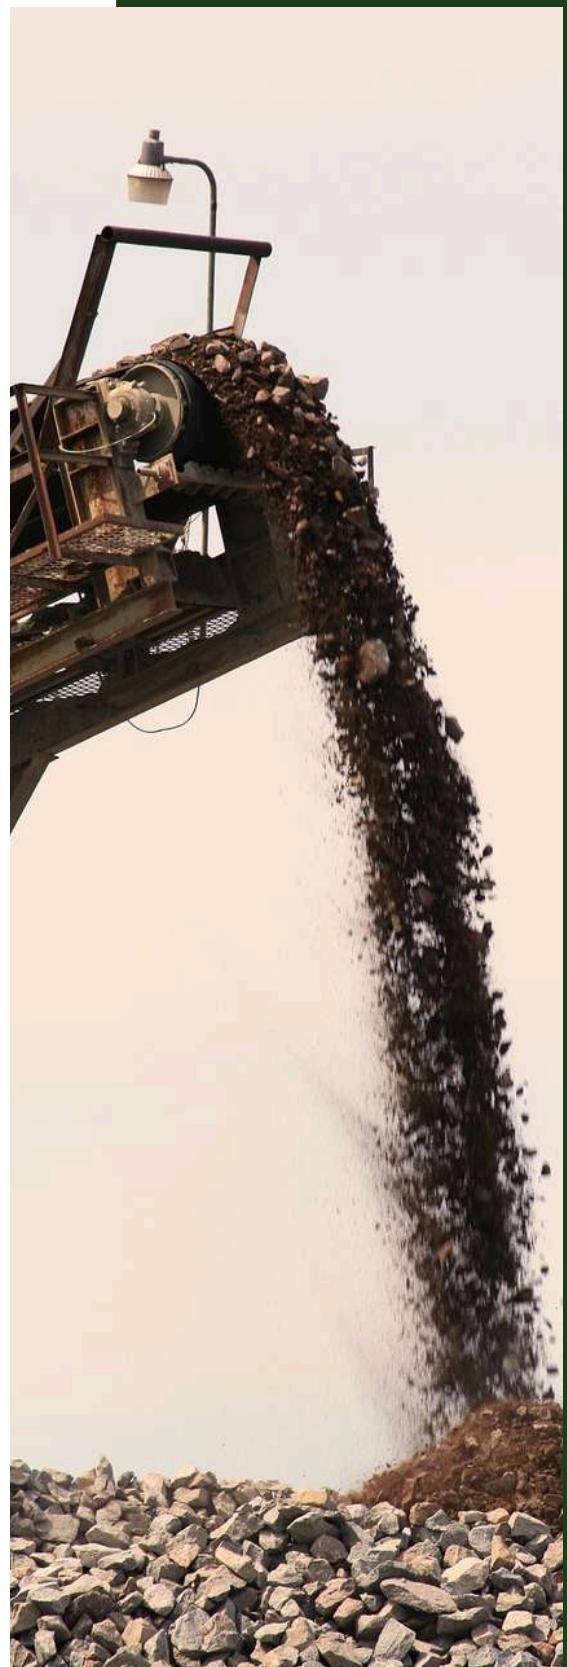

SAFETY, COMPLIANCE & HSEQ

- Class B Asbestos Removal Licence (WR1362)
- Class 2 Demolition Licence (WAD234)
- Controlled Waste Carrier Licence (T01078)
- DWER licensed MRF, landfills & transfer stations (e.g. L7060/1997/13)
- Full HSEQ Management System aligned with ISO 45001 (Safety)
- Safety systems and third-party monitoring, with a zero harm culture and accredited personnel
- Regular training, audits, and monitoring ensure PRR's commitment to continuous improvement, risk mitigation and client assurance

SUSTAINABILITY & ENVIRONMENTAL PERFORMANCE

- Sustainability & Environmental Performance
- Recycling Rates: Up to 98% of C&D waste diverted from landfill and reused as new products (sand, aggregate)
- Closed loop processing through accredited MRF; real-time traceability via Waste Edge reporting.
- Partnerships with councils and environmental bodies to deliver compliant and transparent waste solutions.

OUR VALUE

SAFETY FIRST

We prioritise the safety of our people, partners, and the communities we operate in. Every project is delivered with strict adherence to safety standards and best practices.

RELIABILITY

Our clients count on us to deliver consistent, dependable service. We honour our commitments and complete every job with precision and professionalism.

INTEGRITY

We operate with honesty, transparency, and respect in all aspects of our work. Building long-term relationships based on trust.

SUSTAINABILITY

We are committed to environmentally responsible practices, minimising waste and supporting resource recovery in every project we undertake.

At Peel Resource Recovery, our values are more than just words—they guide every decision we make and every project we deliver.

From safety and integrity to innovation and sustainability, these principles reflect who we are and how we work.

They underpin our commitment to quality, strengthen our client partnerships, and drive us to continually improve in everything we do.

INNOVATION

We embrace new technologies and smarter ways of working to improve efficiency, reduce impact, and add value for our clients.

TEAMWORK

We believe in the power of collaboration within our team and with our clients to achieve the best outcomes safely and efficiently.

Waste Management

Peel Resource Recovery delivers efficient and sustainable waste management services for the construction, civil, and industrial sectors. Operating from our modern recovery facility in Nambeelup and four transfer stations across Perth, Bunbury, Pinjarra, and Busselton, we process construction and demolition (C&D) waste into high-quality recycled materials such as road base, sand, and aggregates.

Our services include on-site bin supply, transport, material recovery, and compliant reporting. With a focus on landfill diversion and circular economy outcomes, PRR is a trusted partner for cost-effective and environmentally responsible waste solutions.

Crushing & Screening

Peel Resource Recovery delivers efficient, fully licensed crushing and screening solutions for projects of all sizes across mining, construction, and infrastructure sectors.

With mobile and fixed plant options, we process materials on-site or off-site—producing high-quality recycled and quarried aggregates, road base, and engineered fill. Our experienced team ensures fast mobilisation, real-time reporting, and full compliance with safety and environmental standards.

Whether supporting local councils, Tier 1 contractors, or private developers, we provide reliable, scalable services that keep projects moving—on time and on budget.

Site/Soil Remediation

Peel Resource Recovery delivers comprehensive site remediation solutions for land development, infrastructure, industrial, and mining projects across Western Australia. We specialise in the safe treatment and management of contaminated soils, ensuring full environmental compliance and project readiness.

Our licensed Nambeelup facility accepts a wide range of soil types, including Category A, B, and C. With tailored strategies, efficient turnaround, and regulatory reporting, we help clients minimise environmental risk, reduce costs, and stay on schedule. PRR is your trusted partner for sustainable, compliant site remediation.

Demolition

Peel Resource Recovery provides safe, efficient, and compliant demolition services for commercial, civil, industrial, and mining projects across WA. From planning to waste recovery, we manage the full process with a strong focus on safety and environmental performance.

Our team handles complex demolitions, including hazardous material removal, and recovers materials through our recycling network to reduce landfill. PRR delivers reliable, end-to-end demolition solutions for both urban and remote sites.

Asbestos Disposal

Peel Resource Recovery specialize in safe and compliant asbestos removal and disposal solutions, ensuring the highest standards of safety and environmental responsibility. Our experienced team follows strict regulations and industry best practices to manage asbestos-containing materials effectively, minimizing risk to workers, clients, and the environment.

From small renovations to large-scale projects, we tailor our services to meet your specific needs, providing efficient, reliable, and risk-free asbestos management. Trust us to handle your asbestos disposal with professionalism, safety, and environmental sustainability at the core of our operations.

Construction Materials Supply

Peel Resource Recovery offer high-quality sand and aggregate materials tailored to meet the diverse needs of construction, landscaping, and industrial projects. Our extensive range of products includes various types of sand and aggregates, carefully sourced and processed to ensure consistency, purity, and durability.

With a focus on reliability and timely delivery, our team works closely with clients to provide solutions that enhance project efficiency and quality. Whether for large-scale infrastructure, commercial developments, or residential projects, our sand and aggregate services are your trusted partner for superior materials and professional service.

Tyre Disposal

Peel Resource Recovery provide environmentally responsible tyre disposal and secure storage services, helping clients manage waste safely and comply with environmental regulations. Our expert team ensures the proper handling, transportation, and disposal of tyres, minimizing environmental impact and reducing health and safety risks.

Additionally, our secure tyre storage solutions are designed to safely contain and manage large quantities of tyres, preventing hazards and promoting sustainable waste management practices. Trust us for reliable, compliant, and environmentally conscious tyre management tailored to your project needs.

Equipment Hire

Peel Resource Recovery offers a comprehensive range of high-quality crushing and screening equipment for hire, tailored to meet the demands of construction, mining, and resource recovery projects. Our equipment is maintained to the highest standards to ensure reliability, efficiency, and safety on every site.

Whether you need short-term support or long-term solutions, we provide flexible hire options backed by expert service and support. With a strong focus on delivering cost-effective outcomes, we help our clients keep projects on track and within budget across Western Australia.

Heavy Haulage

Peel Resource Recovery provide expert heavy haulage and bulk transport solutions for large, heavy, and oversize loads across various industries. Our fleet is equipped to handle complex logistics, ensuring safe, efficient, and timely delivery of your critical materials and equipment. With a focus on safety, compliance, and reliability, our experienced team manages every aspect of heavy transport, from planning to execution, to meet your project deadlines and operational needs.

We are committed to delivering flexible, cost-effective logistics solutions that support your business growth and project success.

OUR PEOPLE

At Peel Resource Recovery, strong leadership and a united team culture are the foundation of our success. We believe great outcomes come from passionate, skilled people working together toward a common goal. Our teams—from project managers and engineers to operators and support staff—bring deep expertise and commitment to every project across waste management, crushing and screening, demolition, and site remediation. We collaborate closely with clients, partners, and stakeholders to deliver safe, efficient, and sustainable solutions that meet the evolving needs of Western Australia's construction and resource sectors.

We prioritise a safe, inclusive, and high-performing workplace where continuous improvement is embedded in our culture. Our safety systems and risk management practices are constantly refined to protect our people and the communities we serve. With a flexible, whole-of-business approach, we adapt to challenges, solve problems quickly, and deliver on our promises—earning the trust of our clients and maintaining the high standards that define Peel Resource Recovery.

OUR SOCIAL IMPACT

PRR have in the past supported many not for profit organisations including Cancer Council, Nation Breast Cancer Foundation and Epilepsy WA, and on a local level - Australind Lions Club (see attached).

Through our sister company West Coast Waste, we have provided sponsorship support or bin donations to the following local causes:

- Victims of the tornado that swept through Bunbury last year were provided free bins to assist with the cleanup
- Riding for the Disabled -Peel Region
- Brunswick Agricultural Show
- Augusta Margaret River Speedway

RECENT PROJECTS

SRG Global Gravel Crushing at Worsley

Since 2024, Peel Resource Recovery has been successfully delivering large-scale gravel and sockschabing and screening works across South32's mining leases in Worsley and Hotham. The scope includes the production of 100,000 tonne of 37.5mm minus coadbase produced to SRG engineers specification. Our dedicated team operates a fleet comprising a excavators, loaders, crushers and screeners to ensure safe, efficient, and compliant project execution. Works are carried out with a strong emphasis on environmental responsibility, safety, and minimal disruption to ongoing site operations.

Talison Lithium Crushing and Screening

We processed over 400,000 tended of laterite ore, crushing and screening to produce gravel sizes of 75mm minus and 37.5mm minus MRD specifications. The project involved extensive drilling and blasting, followed by efficient crushing and screening to meet production targets. Our team ensured safety, quality, and timely delivery, supporting Talison's lithium operations in a demanding mining environment.

South West Gateway Alliance – Bunbury Outer Ring Road

Since 2023, Peel Resource Recovery has been engaged to demolish and remove 14 houses, sheds, and associated infrastructure along the new BORR alignment. Working in partnership with the South West Gateway Alliance, our team has utilised a fleet including a 30-tonne excavator, 950 loader, water cart, Besitcask, and semis to deliver safe, efficient, and timely demolition services. The project is delivered with strict adherence to environmental and safety standards, ensuring minimal impact to the surrounding community and road construction schedule.

For more information about our other projects and services, please check out our website at www.peelresource.com.au or contact our office directly.

AREAS OF OPERATION

Peel Resource Recovery operates across Western Australia, with a strong presence in the Perth Metro region, South West, and extending statewide for key services. Waste management services cover from Perth to Augusta, while crushing and screening, site remediation, earthmoving, and equipment hire operate statewide, including remote and regional areas. Demolition and construction material supply are concentrated between Pinjarra and Augusta, with civil contracting focused in the South West. Asbestos disposal is managed primarily in the Bunbury region, and services such as tyre disposal and heavy haulage also extend statewide, supporting both local and large-scale projects across WA.

PROJECT REACH

- 50+ Major Projects Completed Across WA
- Active in 10+ Local Government Areas
- Remote & Regional Site Expertise
- Partnered with Environmental & Government Agencies
- Proven Track Record in ACM and Lead Contamination
